**INSTITUTE FOR ENGINEERING RESEARCH AND PUBLICATION**

Dear {{IFERP Member}},

Welcome to the December 2022 Newsletter from the Institute for Engineering Research and Publication! This month was one of collaboration and enlightenment. We have seen tremendous success from our Industrial and Institution collaboration, a faculty development program, conferences and a webinar that provided insight into the engineering world.

We are pleased to announce that our Industrial and Institution collaboration has been a great success by signing MOU's. We have been able to connect engineers, researchers and students from across the country and form partnerships that will truly make a difference. This collaboration has helped to bridge the gap between the research and industry, creating a more productive and efficient environment.

Our faculty development program was also a success. We had a number of renowned experts in the engineering field come in and present their research and share their knowledge. This program was an invaluable source of education and growth for all attendees. We also held few conferences this month that brought together experts from around the world. These conferences allowed us to discuss the latest trends and topics in engineering research. We are grateful to all the participants who attended and shared their knowledge and insight.

Finally, we held a webinar this month that provided a platform for engineers to engage in discussion and learn from each other. This webinar was a great success and we are looking forward to more in the future. We are proud to have had such a great month of collaboration and enlightenment.

We are looking forward to continuing this success into the new year of 2023.

Thank you for being part of this journey.
